

Configuring Internet Browser Explorer 4.0

Before you begin, you will need the following account details, supplied to you by FunnelWeb Internet:

- Your UserName
- Your Password

Please Note:

FunnelWeb Internet's Support Team cannot offer support for general software related problems. We can only assist you with connectivity of your operating system to our system and basic configuration of your browser software.

This documentation assumes that you have already configured your modem to connect to FunnelWeb Internet. If you have not done this, you can find the instructions here.

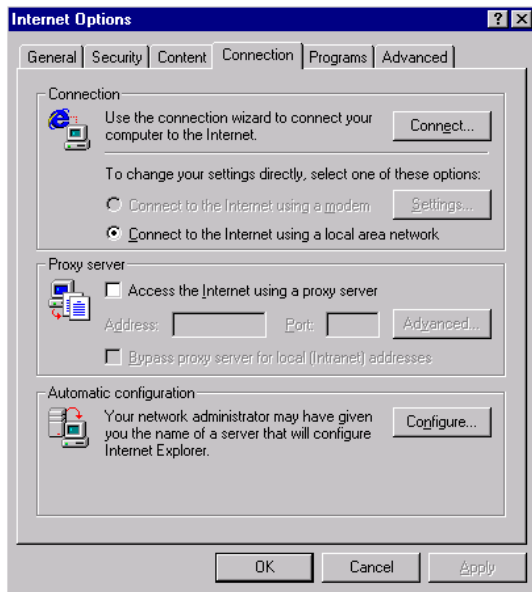

Let's start...

Start Internet Explorer by clicking on the  icon on your desktop. When the Internet Explorer main window appears click on the "Tools" pull-down menu and select "Internet Options".

In the Home Page section at the top of the screen enter the FunnelWeb Internet home page location as your default home page - <http://www.funnelwebinternet.com.au>.

Next, click on the “Connections” tab at the top of the window.

In the “Proxy Server” section make sure that in the box titled “Proxy Server” the option “Access the Internet using a proxy server” is not selected.

Next, click on the “OK” button.

Your browser is now correctly configured to access the Internet! If you have any difficulties, please contact FunnelWeb Internet on 1300 360 024 or email support@fwi.net.au.
